

PHONES 56 & 57

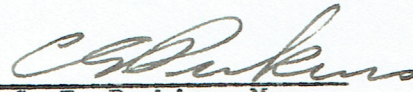

ROANE STREET

June 16, 1958

Verbal agreement between Chas. Williams and Harriman Utility Board (Stanley Kelly and C. E. Perkins -Representing HUB) was entered into for clearing right-of-way of existing power line across his property to serve Chas. Scott's property, said clearance to be a minimum of $12\frac{1}{2}$ feet from C/L of existing pole line. Also, it was agreed that additional poles were to be set along his private road and county road with necessary clearing for the Pump station power line.

The consideration was a water tap for \$25.00 instead of regular tap charge for \$125.00. Said tap to be made off the 6" water line to Disposal Plant or if water is made available along county road at his private drive, then he could get water at this point.
